Winter Semester Examination – December – 2019

Sub	ject:- Power System Modeling (MTEPS101/ MTEE101) Mar	ester: I ks: 60 e:3 Hrs.
Instr	uctions to the Students 1. Each question carries 12 marks. 2. Attempt any five questions of the following. 3. Illustrate your answers with neat sketches, diagram etc., wherever necessary. 4. If some part or parameter is noticed to be missing, you may appropriately assume it ar mention it clearly.	nd should
Q.1.	Explain the underlying principle behind the park's transformation. Writ equations for synchronous generation in d-q-o forms.	Marks) e the (12)
Q.2.	a) What is need for power system modeling?b) Explain modeling of phase shifting transformer	(6) (6)
Q.3.	a) State & Explain Synchronous machine connected to an infinite busb) Explain model required for steady state analysis of syn. Machine.	(6) (6)
Q.4.	a) Explain basic principle of Excitation systems of syn. Machine.b) Explain types of excitation system with neat labeled block diag	(6) rams. (6)
Q.5.	a) Explain Modeling of excitation systems.b) Explain modeling of self excited dc exciter.	(6) (6)
Q.6.	a) Explain load modeling parameters acquisition methods.b) Explain Modeling of static V AR compensators.	(6) (6)
	Paper End	

Winter Semester Examination – Dec – 2019

EPS Branch: M.Tech. Semester: II Subject:- Power System Dynamics and control (MTEPS201) Marks: 60 Time: 3 Hrs. Instructions to the Students 1. Each question carries 12 marks. 2. Attempt any five questions of the following. 3. Illustrate your answers with neat sketches, diagram etc., wherever necessary. 4. If some part or parameter is noticed to be missing, you may appropriately assume it and should mention it clearly. (Marks) Q.1. Explain Classical Methods of Synchronous Generator Connected To Infinite Bus System model. Q.2. Attempt any two of the following (12)a) Explain applications of Routh-Hurwitz criterion. b) State & Explain analysis of synchronizing and damping torque of machine. c) Explain of dynamics of load and SVC. Q.3. Attempt any two of the following (12)a) Explain step of PSS design and give any design application. b) Explain Basic concepts of control signals in PSS. c) Explain Future trends of PSS. Q.4. Attempt any two of the following (12)a) State & Explain Statespace representation. **b)** Explain Effect of field flux variation on system stability. c) Explain Rotor angle stability.

Q.5. Attempt any two of the following (12)

a) Draw & Explain Simple thyristor excitation system.

- b) Explain Analysis of effect of AVR on synchronizing and damping components.
- c) Explain Block diagram of PSS with description.

Q.6. Attempt any two of the following

(12)

- a) Explain Digital Stabilizer Excitation control design.
- b) Explain Exciter gain Phase lead compensation.
- d) Explain Stabilizing signal washout stabilizer gain.

Paper End

Winter Semester Examination – December - 2019

Branch: M.Tech Electrical (Electrical Power System) Sem.:- I Marks: 60 **Subject:- Advanced Power Electronics (MTEPS103/MTEE102)** Date:- 12/12/2019 Time: - 3 Hr. Instructions to the Students 1. Each question carries 12 marks. 2. Attempt any five questions of the following. 3. Illustrate your answers with neat sketches, diagram etc., wherever necessary. 4. If some part or parameter is noticed to be missing, you may appropriately assume it and should mention it clearly (Marks) Q.1. (12)(a) State and Explain turn ON methods of SCR (b) Explain switching characteristics of IGBT with voltage and current waveform. Q.2. (12)(a) Explain in detail the operation of dual converter without circulating current. (b) Explain three phase semi converter with RLE Load. 0.3. (12)(a) Explain the operation buck-boost converter. List the advantages and disadvantages of this type of converter. **(b)** Write a short note on class D chopper. 0.4. (12)(a) Draw and Explain 180 degree mode operation of three phase inverter. (b) Write a short note on Harmonic reduction for inverter. **O.5.** (12)(a) Write short notes on ZVS Multi-resonant Converter. (b) Describe the series resonant inverters with unidirectional switches in briefly. Q.6. (12)(a) Write short note on use of Power Electronics in HVDC transmission. (b) What is the maximum power point tracking? Explain it with block diagram?

Paper End

Winter End Semester Examination – December 2019

Branch: M.Tech. Eps	Semester: I
Subject:- Advance Power System Protection (MTEPS202/MTEE202)	Marks: 60
Date:- 13/12/2019	Time:3 Hrs.
Instructions to the Students 1. Each question carries 12 marks. 2. Attempt any five questions of the following. 3. Illustrate your answers with neat sketches, diagram etc., wherever necessary. 4. If some part or parameter is noticed to be missing, you may appropriately assemention it clearly.	sume it and should
	(Marks)
Q.1. Explain the basic construction of static relays.	(12)
Q.2. What are phase comparators? Explain block spike phase comparator.	(12)
Q.3. Define and explain MHO relay sampling comparator.	(12)
Q.4 Explain basic principle of digital computer relaying.	(12)
Q.5. Explain effect of power swing on the performance of distance relays.	(12)
Q.6. What is a switched distance schemes	(12)
Paper End	

Winter Semester Examination – Dec – 2019

	William Collisors, Eventuality	<u> 179</u>
Branch: M.Tech. (Electrical Power System) Subject:-: SMART GRID DESIGN AND ANALYSIS MTEPS203B Marks:60 Date:- 16/12/2019 Instructions to the Students 1. Each question carries 12 marks. 2. Attempt any five questions of the following. 3. Illustrate your answers with neat sketches, diagram etc., wherever necessary. 4. If some part or parameter is noticed to be missing, you may appropriately assume it and should mention it clearly.		rks:60
~ 1	A) What is the need of Smart Grid and Explain neatly with detailed reaso	,
Q.1.	B) Distinguish between Conventional Grid and Smart Grid.	(6)
~ ^	A) Explain in detail about the Architecture of the Smart Grid.	(6)
Q.2.	B] Elaborate Functions of Smart Grid Components	(6)
	Q.3.A] Draw the Structure PMU neatly and explain in detail about the fur	ections of
1	PMU.	(6)
. %	B] Write down the Applications of PMU.	(6)
$O^{\frac{1}{4}}$	A] Elaborate challenges to load flow in smart grid and weaknesses of	
Q.4.	the present load flow methods.	(6)
	B) How Load flow for smart grid can be design? Explain in detail.	(6)
0.5	A] Discuss Voltage Stability Assessment Techniques.	(6)
Q.5,	B] Discuss Energy management in smart grid.	(6)
0.6	A] Explain about Plug-in Hybrid Electric Vehicle technology.	(6
Q.6.	B) Explain about the case studies regarding the Energy Storage systems Paper End	. (6

Winter Semester Examination – Dec 2019

Subject: Renewable Er Date: 17/12/2019	nergy Systems (MTEPS102/1 Marks: 60	Time: 3Hrs.
3. Illustrate your ansy	ies 12 marks. questions of the following. wers with neat sketches, diagram et ameter is noticed to be missing, yo	tc., wherever necessary. ou may appropriately assume it an
Funds (PCF)	pt of Clean Development Mechani urces (Conventional and nonconve	
Q.2. What is Biomass? Exponversion systems.	plain the resources of biomass. Exp	plain the ocean-thermal energy (12)
Q.3. Explain different types power density with proper c	s of forces on the blades of a wind expression.	propeller. Also explain wind (12)
Q.4. Discuss the performan	nce of grid connected wind power	system. (12)
Q.5. Solve Any Two of the a. List the merits and limita b. Characteristics of PV sysc. Construction of wind Tur	tion of a solar Photovoltaic system stems	(12) n.
Q.6. Solve the following.a. Describe critical parametb. Explain the different poven	ters require for integration of grid ver quality issues arising in grid co	with the system. (06) onnected system. (06)

LONERE - RAIGAD - 402 103 Winter Semester Examination - Dec - 2019

Subj	ect:-:Modelling and Simulation of Power Electronics System. MTE	ester:II PS204B le:3 Hrs.
Instru	1. Each question carries 12 marks. 2. Attempt any five questions of the following. 3. Illustrate your answers with neat sketches, diagram etc., wherever necessary. 4. If some part or parameter is noticed to be missing, you may appropriately assume it a mention it clearly.	nd should
		(Marks)
Q.1.	A) Explain some time domain analysis techniques in detail? Discuss challenges computer simulation B) What is the role of computer simulation in electrical systems.	(6) (6)
Q.2.	Discuss state space representation of Buck-Boost converter in detail.	(12)
Q.3.	Explain any trapezoidal integration method for simulation in detail	(12)
Q.4.	A] Explain state space model of 3-ph induction motor. B) Explain in detail the simulation of 3phase 3 level inverter drive for 3 phase Ir Motor.	(6) nduction (6)
Q.5.	Discuss the analysis of modelling and simulation of series VAR compensation.	(12)
Q.6.	A] Elaborate how is the simulation and design of power electronic converted space averaged models. B) Elaborate with example LINIERIZATION of converters with transfer function.	(6)
Q.7	A) Explain the modelling of UPFC . B). Explain the modelling of STATCOM.	(6) (6)
	Paper End	-

Winter End Semester Examination – December 2019

Branch: M. Tech. EPS Semester: I Subject:- High Voltage Power Transmission (MTEPS104A) Marks: 60 Date: - 19/12/2019 Time: 3 Hrs. Instructions to the Students 1. Each question carries 12 marks. 2. Attempt any five questions of the following. 3. Illustrate your answers with neat sketches, diagram etc., wherever necessary. 4. If some part or parameter is noticed to be missing, you may appropriately assume it and should mention it clearly. (Marks) Q.1. With reference to EHVAC Line, discuss the following factors. (12)i) Corona bundle conductors ii) Clearances in towers. iii) Location of ground wire. iv) Power transfer ability Q.2. Explain lightning phenomenon and over voltages due to lightening. (12)Q.3. Explain Bewley's lattice diagram. (12)Q.4Explain insulation co-ordination in a power system (12)Q.5. State and explain the requirements for satisfactory operation of HVDC link. (12)Q.6. Write note on corona and its effects on EHVAC line. (12)

Winter Semester Examination – Dec – 2019

Branch: M. Tech. (Electrical)	Semester: II	
Subject: - Research Methodology (MTEE205E)	Marks: 60	
Date: - 20/12/2019	Time: 3 Hrs.	
Instructions to the Students 1. Each question carries 12 marks. 2. Attempt any five questions of the following. 3. Illustrate your answers with neat sketches, diagram etc., who 4. If some part or parameter is noticed to be missing, you may should mention it clearly.	erever necessary. appropriately assume it and	
Q.1. Briefly describe the different steps involved in a research	(Marks) process? (12)	
Q.2. How would you differentiate between simple random san sampling designs? Explain clearly giving examples.	npling and complex random (12)	
Q.3. How will you differentiate between descriptive and inferentiate important measures used to summarise the data.	itial statistics? Describe the (12)	
Q.4. Write a short note on sampling error and central limit theo	orem. (12)	
Q.5. Explain the meaning of analysis of variance. Describe brid of variance for one way and two way classification.	efly the technique of analysis (12)	
Q.6. What do you mean by multivariate analysis? Explain how analysis. Paper End	it differ from bivariate (12)	

Winter Semester Examination – December – 2019

Date: - 20/12/2019	Marks: 60 Ti	ime: 3 Hrs
Instructions to the Students 1. Each question carries 12 marks. 2. Attempt any five questions of the follo 3. Illustrate your answers with neat sketch 4. If some part or parameter is noticed to mention it clearly.		t and should
		(Marks)
Q.1. Write notes on following topics a.) Energy Audit of Buildings.		(12)
b.) Considerations in implementing	ng energy conservation programme	es.
Q.2. a) State the operation of utility mo b) Which are the HVAC condition	nitoring and control system. s and quantities to be monitored or	(06)
controlled?		(06)
Q.3. a) Discuss energy-efficient motors	with measures adopted for energy	
efficiency.		(08)
b) Draw the Sankey diagram of an	induction motor with neat label.	(04)
Q.4. Write the short notes on following.		(12)
a) Multitasking solid-state meters.		
b) The use of instrument transform c) Paralleling of current transform	ners with watt-hour and demand m ers.	eters.
Q.5. Attempt any one sub-question of tl	ne following.	
a) Discuss the basic terms in lighting	ng system and features in details.	(12)
b) Explain classification of cogener		(12)
Q.6. a) Explain the method of life cycle	costing?	(06)
b) Write short notes on		(06)
i.) Return on Investment (ROI).		
ii.) Time Value of Money.

LONERE - RAIGAD - 402 103 Winter Semester Examination - December - 2019

Branch: M.Tech. (Electrical Power System) Semester: I Subject :- MTEPS105B: Power Quality Assessment And Mitigation Marks:60 Date: - 21/12/2019 Time: 3 Hrs. Instructions to the Students 1. Each question carries 12 marks. 2. Attempt any five questions of the following. 3. Illustrate your answers with neat sketches, diagram etc., wherever necessary. 4. If some part or parameter is noticed to be missing, you may appropriately assume it and should mention it clearly. (Marks) Q.1. A] Explain importance of the different power quality terms? Define all. (6)B] What are Good grounding practices and give poor grounding problems. Q.2. A] Explain Various devices used for voltage regulation and give their impact of on reactive power management B] what are Various causes of flicker and their effects. Explain means to reduce. (6)Q.3. A] Compare Voltage sags versus interruptions. (6)B] Explain in detail different mitigation techniques for voltage sag. (6)Q.4. A] What are the Harmonics series and parallel resonances. Consequences of harmonic resonance. B] Explain Harmonic filtering also passive and active filters. (6)Q.5. A] What is need of power quality monitoring considerations & approaches. (6) B] List power quality measurement equipments. Discuss Selection of power quality monitors, selection of monitoring location and period. (6)A] Explain Power quality indices and standards for assessment disturbances. (6) Q.6. B] Discuss Power assessment under waveform distortion conditions. (6)
